

Tidel D4 Tube Vend

The Tidel D4 Tube Vend™ is a proven cash management system that helps retail organizations reduce the risk of internal theft, streamline in-store management time, and create greater efficiencies in store operations.

Ideally suited for the convenience store industry, the Tidel D4 Tube Vend is an effective solution to help manage the store's change fund.

The Tidel D4 Tube Vend offers 8 columns that can fit up to 11 tubes per column, and each tube can be fitted with either notes or coins. Once the tubes are loaded and recorded using the Tidel D4 console, the inventory is then automatically tracked and recorded as it is removed by authorized store personnel. The Tidel D4 end-of-day report will display the amount of cash removed by each employee, by user PIN, along with the amount of cash deposited into the Tidel D4 note validators or into the manual drop slot. The sum of all transactions, by user PIN, will assist the manager in balancing each cashier against their cash sales recorded by the point-of-sale system. Tube inventory reports will indicate the needed funds required to load the Tidel D4 Tube Vend, which is typically a once per day function.

Each tube vending occurrence is enabled after an automatic time delay sequence is completed. This time delay serves as an effective deterrent to armed robbery. An "Buy Change" function requires a cashier to purchase their tubes of change by depositing the same amount of currency through the note validators, thus limiting the loan amounts to each cashier.

Tidel D4

Tube Vend

Specifications

Hardware Features

- 7" Color console screen
- Note validator maintenance door – enables validator heads to be removed in the event of a note jam
- Two bottom vault options – storage vault (includes drop slot), or mailbox drop vault
- Support for single or bulk note validators
- Support for standard (1,200 notes) or XL (2,250 notes) Cassettes
- Support for detached Tube Vend module – connects to Series 4 via provided data cable
- Integrated thermal printer with receipt cutter
- Integrated tube loading gate that prevents unauthorized loading of tubes
- Stores 11 tubes of 8 denominations for a total of 88 tubes
- Each tube can hold up to 20 notes or a roll of coins

Software Features

- Integrated console to control all tube vend functions
- Personal Identification Number (PIN) and/or iButton allows managed access to functions, reports, and instant access
- Tubes can be vended by authorized personnel
- Tube vending limits can be placed on any cashier or manager
- Up to five adjustable time delays between each tube vend occurrence
- "Buy Change" allows for the exchange of a note for tubes of change
- All transactions, deposits, drops and vault access can be audited to an individual user through the use of PINs

Warranty

- 1 year parts and 90 days labor (inside the US)
- 1 year parts only (outside the US)

Power Requirements

- 120 VAC 60Hz or 220 VAC 50Hz
