

# Tidel Announces the TR180 Cash Recycler

*Groundbreaking Design and Functionality set a New Standard for Retail Cash Recycling*

CARROLLTON, TEXAS – January 15, 2022— Tidel, a world leader in cash automation systems for the retail marketplace, today announced the TR180, a next generation retail cash recycler offering an unparalleled combination of performance, ergonomics, and configurability, all in a fully integrated, turnkey system.

Key features of the TR180 cash recycler include:

- 6,450 total note capacity
- 10 notes per second processing speed
- Recycle support for up to 4 note denominations
- Split denomination recycle cassettes
- 15” touchscreen console
- Connectivity to a wide range of Tidel peripherals, including coin recyclers, secondary storage vaults and rolled coin dispensing solutions
- Supported by the Tidel TR Software platform and remote management application

“The TR180 offers an optimal balance of system economics with a retailer’s need for a reliable, high performing system to automate their back-office cash handling processes,” said Marty Hendrickson, VP of Strategic Initiatives and Recyclers, Tidel. “With the TR180, the retail market can benefit from a high performing cash recycler with unmatched configurability, all at a great value. The TR180 is well positioned to help organizations automate their cash handling processes while allowing them to realize a substantial return on their investment.”
